BEARING OIL

BENEFITS:

- » Light in Color
- » Excellent Corrosion Protection
- » Very Good Water Separation Characteristics

MADE IN U.S.A.

SPINDLE / NEEDLE BEARING OIL

AMALIE Spindle / Needle Bearing Oil 10 is a low viscosity oil used to lubricate the bearings of commercial sewing and textile equipment where the yarn or fabric does not contact the lubricant. This oil is also recommended for high-speed spindle bearings in precision grinders and other machine tools requiring a low-viscosity oil. This product offers strong oxidation and rust resistance properties. The higher viscosity index (VI) of this oil reduces the tendency for stray mist or fogging in higher speed applications. **AMALIE Spindle / Needle Bearing Oil 10** is suitable for use wherever strong oxidation protection and rust inhibition are required. Not recommended for applications where the spindle oil contacts the yarn or fabric.

TYPICAL PHYSICAL AND CHEMICAL PROPERTIES

ISO Viscosity Grade.....	10
API Gravity.....	38.5
Flash Point, °C.....	155
Viscosity @100, cSt.....	2.5
Viscosity @40, cSt.....	10.0
Total Acid Number (TAN).....	0.5
Pour Point, °C.....	-30

Typical values are listed. Variations not affecting the performance of this fluid may occur during production; however, these variations will not fall outside of set specification parameters.

PERFORMANCE APPLICATION CHART

SPECIFICATIONS	SPINDLE / NEEDLE ISO 10
Cincinnati Machine	Meets
Rust, ASTM D 665A, B	Pass
Corrosion, ASTM D 130	Pass
Demulsibility ASTM D 2711(pass)	Pass
Oxidation, S-200 (pass)	Pass
Foam Inhibition, ASTM D 892 (pass)	Pass

Please consult AMALIE Technical Services or your local representative for a full listing of applications.
